

What We Back Up For Bitbucket

Rewind protects your business-critical Bitbucket source code data by offering an automatic backup solution and robust export capabilities to enable your business to be compliant and recover from data loss quickly. No coding or maintenance needed.

Here's What We Back Up:

Workspace (including metadata)

Projects

Repository (including metadata)

Branches

Issues (including comments)

Tags

Pull requests (including activity log)

Pull request reviewer

Issues (including comments)

Issue attachments

Branch restriction

Pipeline schedule

More...

Improve your disaster recovery and be audit-ready in a few minutes

Integrate Bitbucket backups just in a few clicks. Automate your daily backups and initiate an extra backup as many times as you need. Get calendar access to all of your backups through the Rewind Vault for easy exports. All of the backups are stored on Rewind's secure and redundant cloud with unlimited cloud storage and 365 days of retention.

Export your backups in a few clicks and recover your data quickly

With Rewind Backups for Bitbucket you can export your backup versioned GIT data and metadata quickly. All you need to do to restore your code is to clone it from your exports or import it to Bitbucket.

Meet compliance needs faster

Compliance with SOC 2, HIPAA, ISO 27001, and more is simple with automated backups. Rewind is the leading provider of secure, SOC 2 compliant backup and recovery solutions. For more on our security posture, [read here](#).
